## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election with traverse of claims 1-4 in the reply filed on April 16, 2008 is acknowledged. The traversal is on the ground(s) that there is no serious burden on the examiner. This is not found persuasive because claims 5 and 6 are directed to subject matter in a totally different class/subclass that does not require searching in the examination of claims 1-4.

The requirement is still deemed proper and is therefore made FINAL.

### **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 5 and 6 are canceled.

### ***Allowable Subject Matter***

3. Claims 1-4 are allowed over the prior art of record.
4. The following is an examiner's statement of reasons for allowance: an analysis apparatus as claimed, more specifically in combination with: an analysis object disposed in part of the optical disc; the control unit has a second switching state in which feedback is performed such that a detection signal has a constant average value; the control unit switches to the first state until a reading position of the analysis object is detected; and switches to the second state at the reading position, is not disclosed or made obvious by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the

Art Unit: 2878

payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hurt et al. (U.S. Patent Application Publication 2003/0224457) disclose (Fig. 10) a conventional analysis optical disc reading apparatus.
